The Minab Protocol

Emergency press brief and distribution package summary

The Minab Protocol is a public, machine-readable 100-step de-escalation framework released in response to the Minab school strike. This brief is designed for journalists, researchers, human-rights organizations, and technical systems that need a fast, quotable overview plus stable URLs.

Version	1.1.0	Last verified	2026-03-09
Canonical page	https://lotdpbc.com/minab-protocol	Raw JSON	https://lotdpbc.com/minab-protocol.json
Steps	100	Phases	10

What is live now

The release already includes a public landing page, raw JSON, release text, short aliases, an Atom feed, and a machine-discovery summary. This package adds a press brief, share image, multilingual copy, checksums, and a mirror zip.

The normative recommendations are stable. The war-status context is explicitly marked as a dated snapshot and should be refreshed before republishing as current fact.

Verification and sources

The v1.1 release adds explicit source metadata, confidence labels, and last-verified dates for the highest-impact factual context. The protocol does not claim that every operational detail is independently resolved; it marks mixed-confidence areas and preserves provenance.

Use guidance

Quote the canonical page for narrative context. Use the JSON endpoint for exact fields. Preserve checksums and manifest when mirroring. Re-check the war-status snapshot before restating operational details as current.

This brief was generated programmatically from the validated v1.1 JSON release package.
